

Revolutionizing the Patient-Provider Relationship

Vigilant Health's patient-centered, personal approach delivers remarkable results, including dramatically improved patient outcomes and significant savings for employers and other organizations.

Built on Success

Our model allows providers to deliver health care the way it should be. Our success is based on a strong relationship among patient, physician, and care team that results in immediate and lasting behavior change and improved health. After establishing an unequalled track record in diabetes care, one of the most challenging chronic diseases to treat successfully, Vigilant Health extended its clinical and financial model at the request of clients to address the needs of entire populations.

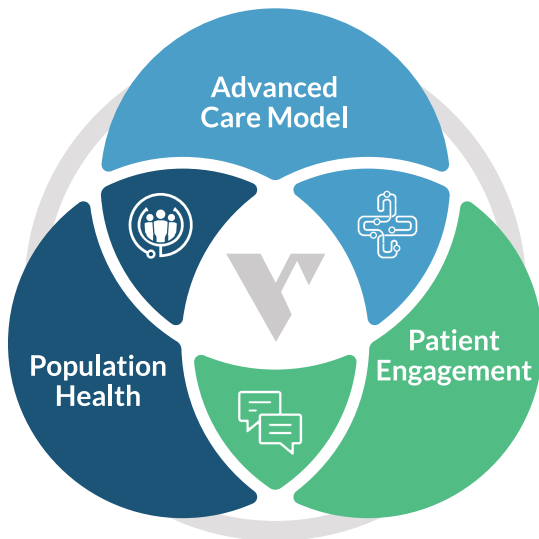

The Vigilant Health Difference

By integrating our proprietary advanced care clinical model and technology with population health and patient engagement, Vigilant Health delivers superior clinical outcomes that result in significant, immediate health care savings for our clients.

Health care Redesigned

Vigilant Health transforms health care by combining advanced technology with highly personal, data-driven care. Our advanced care clinical model significantly improves patient health while delivering dramatic cost savings to employers, health plans, and individuals.

Using proprietary technology, Vigilant Health converts claims and clinical data into actionable information that is used by clinicians to make treatment decisions, develop plans of care, and engage patients. Participating populations benefit from improved health, while high-risk individuals with chronic conditions find new success.

Advanced Care Model

- Physician-Led Care Team
- Local Physician Collaboration
- Data-Infused Clinical Model
- Flexible Care Delivery

Population Health

- Proprietary Technology

Shared savings payment model

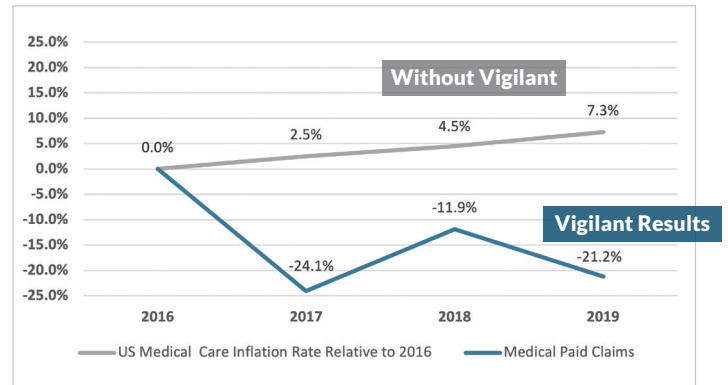

No One is Out of Reach

For over a decade, the Vigilant Health model has produced the same results in every demographic, every payer type, and every market. Our track record includes unprecedented success in disadvantaged populations and rural communities, as well as white collar and blue collar populations.

White Collar Population

Blue Collar Population

“The City of Vicksburg began its relationship with Vigilant Health to improve the health and create a culture of health and well-being for our employees and their dependents, while being fiscally responsible and reducing our health plan costs. In the first six months of our partnership, the program paid for itself and has successfully given more people access to health care, including increased utilization of our fine Vicksburg physicians.”

Mayor George Flaggs, Jr.
City of Vicksburg, Mississippi

Our Clients Say

“Vigilant Health has helped us utilize a more comprehensive approach for managing our health plan by allowing us to understand our data and giving us the ability to act on the information. Their team of providers are outstanding in both the way they care for our employees and the way they communicate with them. It’s really very simple once you have the information in an understandable form and the tools to act on it. Vigilant Health gave us both, and the results have been phenomenal. We haven’t had a premium increase for three years in a row, and Vigilant Health was a key partner in making this happen.”
